

# Définition du langage MoodleScript

Cette documentation détaille les opérations qui sont prises en charge par le Moodlescript dans sa version la plus actuelle.

## Commandes

### ADD

|                               |                                    |                                  |                                       |                                |                                      |                              |
|-------------------------------|------------------------------------|----------------------------------|---------------------------------------|--------------------------------|--------------------------------------|------------------------------|
| <a href="#">ADD BLOCK ...</a> | <a href="#">ADD CAPABILITY ...</a> | <a href="#">ADD CATEGORY ...</a> | <a href="#">ADD CATEGORY PATH ...</a> | <a href="#">ADD COURSE ...</a> | <a href="#">ADD ENROL METHOD ...</a> | <a href="#">ADD USER ...</a> |
|-------------------------------|------------------------------------|----------------------------------|---------------------------------------|--------------------------------|--------------------------------------|------------------------------|

### ASSIGN

|                                 |
|---------------------------------|
| <a href="#">ASSIGN ROLE ...</a> |
|---------------------------------|

### BACKUP

|                                   |                                     |
|-----------------------------------|-------------------------------------|
| <a href="#">BACKUP COURSE ...</a> | <a href="#">BACKUP ACTIVITY ...</a> |
|-----------------------------------|-------------------------------------|

### CLONE

### DELETE

|                                 |
|---------------------------------|
| <a href="#">DELETE USER ...</a> |
|---------------------------------|

### ECHO

|                      |
|----------------------|
| <a href="#">ECHO</a> |
|----------------------|

### ENROL

- [ENROL](#)

### HIDE

|                                |                                 |                                  |
|--------------------------------|---------------------------------|----------------------------------|
| <a href="#">HIDE BLOCK ...</a> | <a href="#">HIDE COURSE ...</a> | <a href="#">HIDE CATEGORY...</a> |
|--------------------------------|---------------------------------|----------------------------------|

### LIST

|                                  |
|----------------------------------|
| <a href="#">LIST GLOBALS ...</a> |
|----------------------------------|

### MOVE

|                                 |                                      |
|---------------------------------|--------------------------------------|
| <a href="#">MOVE COURSE ...</a> | <a href="#">MOVE ROLE ASSIGN ...</a> |
|---------------------------------|--------------------------------------|

## REMOVE

[REMOVE BLOCK ...](#) [REMOVE CAPABILITY ...](#) [REMOVE ENROL METHOD ...](#) [REMOVE MODULE...](#)

## RESTORE

[RESTORE](#)

## SET

[SET PROFILE VALUE ...](#) [SET CONFIG](#)

## SHOW

[SHOW BLOCK ...](#) [SHOW COURSE ...](#)

## UNASSIGN

[UNASSIGN ROLE ...](#)

## UNENROL

- [UNENROL](#)

**Note :** Les commandes barrées ne sont pas actuellement développées, mais sont envisagées comme une évolution souhaitable.

## Autres commandes

- [SUSPEND USER](#)

[Return to component index](#) - [Return to home](#)
